

YASH SHARMA

Vadodara, India • +91 9909723185 • yashsharma.td@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFILE SUMMARY

Final-year B.Tech Data Science student (CGPA: 9.6/10) with 8+ months of industry internship experience in ML, Computer Vision, and Data Science. Proficient in Python, TensorFlow, OpenCV, and LangChain — with hands-on deployment of production-ready models across healthcare, government, and industrial domains. National award finalist recognized by Microsoft & SAP. Actively seeking ML/AI Engineer, Data Scientist, or Full-Stack AI roles.

EDUCATION

B.Tech in Computer Science & Engineering — Specialization: Data Science 2022 – 2026
ITM Vocational University, Vadodara | **CGPA: 9.6 / 10.0**

EXPERIENCE

AI/ML Engineer Intern | **Keya Fusion Technology Pvt. Ltd.** | Vadodara Sep 2025 – Present

- Designed and deployed YOLO-based object detection and CNN image classification models for hardware defect identification, achieving 90%+ accuracy on real device datasets.
- Built OpenCV preprocessing pipelines for real-time image analysis, reducing manual inspection effort by ~40% across prototype validation workflows.
- Developed Python-based ETL pipelines to convert LabVIEW-generated sensor data into structured ML-ready formats, enabling seamless model training integration.
- Collaborated with R&D team to build and test regression models for predictive automation, supporting 3+ active hardware prototypes in production testing.

Data Science Intern | **Apollo Tyres Ltd.** | Vadodara Jul 2025 – Sep 2025

- Processed and cleaned 50,000+ rows of operational manufacturing data using Python and Pandas, improving data quality for downstream analytics by ~30%.
- Performed exploratory data analysis (EDA) on production datasets to uncover performance bottlenecks, surfacing 5+ actionable insights adopted by the operations team.
- Built and deployed 3 interactive Power BI dashboards for internal reporting, used by cross-functional teams to monitor KPIs in real time.
- Documented data workflows and presented analysis findings to senior stakeholders, demonstrating strong communication and professional reporting skills.

PROJECTS

Tuuna — Autonomous AI Agent with Vision & System Control —

Github Link :- github.com/Yashuu213/Tunna-multiSystem-AI

- Built an agentic AI system with real-time screen vision, OS-level mouse/keyboard automation, and autonomous multi-step task execution using Python and Flask.
- Implemented dynamic runtime error recovery via AST-level code rewriting, auto-dependency installation, and multi-model fallback — reducing agent failure rate by ~60%.
- Designed modular Flask architecture with AI decision loops, safety controls, and support for swappable LLM backends (Groq, Gemini, OpenRouter).

GovSecAI — AI-Powered Government Threat Analysis System —

Github Link :- github.com/Yashuu213/GovSecAI-Admin-User

- Engineered NLP pipelines using BERT for multi-label text classification, named entity recognition, and sentiment analysis on government policy documents.
- Processed and visualized threat intelligence data using Pandas and Matplotlib, enabling data-driven risk forecasting with 87%+ classification accuracy.
- Delivered real-time threat detection dashboard adopted for government use-case demonstrations, with full REST API integration via FastAPI.

MediScope (MedAI Diagnostics) — Automated Disease Prediction Platform—

Github Link :- github.com/Yashuu213/GovSecAI-Admin-User

- ▶ Developed ensemble ML models to predict diabetes, heart disease, and liver disease with up to 95% accuracy across 3 independent clinical datasets.
- ▶ Integrated TensorFlow/Keras models with RESTful APIs (FastAPI) for real-time health predictions, supporting sub-200ms inference response time.
- ▶ Implemented Explainable AI (XAI) using SHAP values for transparent model interpretation, increasing clinical trust and decision transparency.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript
ML / DL	TensorFlow, Keras, Scikit-learn, YOLO, BERT, SHAP, LangChain, OpenCV
Data & Viz	Pandas, NumPy, Matplotlib, Seaborn, Power BI
Web & APIs	FastAPI, Flask, Streamlit, REST APIs
DevOps & Tools	Git, Docker, Jupyter, VS Code, MongoDB, LabVIEW
Concepts	Deep Learning, CNNs, NLP, LLMs, RAG, Transformers, XAI, Computer Vision

CERTIFICATIONS

♦ Applied AI Certification	Microsoft
♦ Full Data Science Certification	Oracle
♦ TensorFlow Developer Certificate	Google
♦ Generative AI with LLMs	DeepLearning.AI

ACHIEVEMENTS

- ▶ 🏆 2nd Place — TechSaksham National Showcase 2025: Selected among top 16 AI teams nationally by Microsoft & SAP for developing an AI-powered Healthcare Assistant.
- ▶ Maintained a 9.6 CGPA throughout a 4-year B.Tech program while simultaneously completing 2 industry internships and building 3 production-level AI projects.
